Doorways and Entrances

Insulated laminated Paneled Doors

FRP Skin *(two layers - inside/outside)*

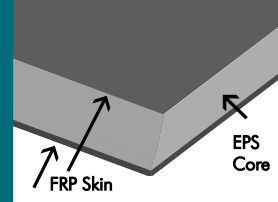

Our interior Glen-door features laminated Fiberglass reinforced polyethylene (FRP) skin. The FRP is totally resistant to moisture, stains, odours, chemicals or rust.

** Aluminum skin or stainless-steel finish for exterior doors*

EPS Core

(middle layer)

The core of our Glen-door consist of expanded polystyrene, (EPS) which will not settle, slump or shrink. R-value (measure of insulation ability) will not deteriorate with time.

(panels also available with 1/8" core EPS & fiberglass backing)

Ideal for cold storage rooms, hog barns, processing plants, trailers, partitions, shops, freezers & coolers.

(Exterior Glen-door with stainless-steel finish)

liner paneling with Glen-door
